

March 23, 2009

To Whom It May Concern:

The purpose of this letter is to recommend Bauer Specialty Insulation as a steel fireproofing and spray-insulation contractor.

Bauer currently holds a prime contract with us for the fireproofing and a significant amount of the sound proofing insulation for a 130,000 square foot, steel framed condo – hotel in Ellicottville, New York. The value of this subcontract is approximately \$225,000.

This project was originally intended to receive fireproofing prior to winter 2008 / 2009 but the start of construction was delayed, forcing the fireproofing work to be completed inside of temporary enclosures during the winter. In spite of less than perfect working conditions, Bauer has nearly completed their work on time and within their contract amount.

They have worked well and coordinated with the other trade contractors on the site and have shown flexibility in reaction to changing project conditions.

I would definitely use this company for any similar work and believe that they could easily handle substantially larger projects.

Sincerely,

D. Richard Fox
President
